SEMINOLE

## BEANS

*The beans we offer are Idaho grown  
and practically disease free.*

### SEMINOLE BEAN — NEW

A new disease resistant greenpod bush bean of Tendergreen type. Picks in 54 days. Plants 20 inches tall with 23 inch spread. Pods average 6 inches long — round, straight, stringless, meaty, fiberless, and good quality. In trials last year this new variety, by far, out-yielded Tendergreen.

Matchless Green Top

**MATCHLESS GREEN TOP**

An Outstanding Stock for Shippers and  
Market Gardeners

A pedigreed stock, the result of many years of breeding; unsurpassed in earliness, uniformity and in depth of interior color. Distinctive green tops, erect, uniform in size and color, bunching very attractively for market. Roots round when young, semi-globular later, deep red, smooth, with small neck and tap root. Flesh deep dark red, tender, and of excellent quality. 55 days.

1 Oz. \$0.15      1/4 Lb. \$0.50      1 Lb. \$1.50

Detroit Dark Red Perfected

**DETROIT DARK RED PERFECTED**

This beet is one of the most outstanding selections of Detroit Dark Red for dark, uniform interior color. Especially adapted for bunching purposes. The root is globe shape, slightly flattened at base. Interior color dark blood red, minimum of zoning. Flesh is excellent in quality. The top is tall, dark green leaves tinged with dark red. This variety is a good grower and heavy cropper. 58 days.

1 Oz. \$0.15      1/4 Lb. \$0.50      1 Lb. \$1.50

## CABBAGE

Early Market

### EARLY MARKET CABBAGE

62 DAYS

This is an extra early strain of Copenhagen, splendid for early market and shippers. Plants small, compact, stem short, heads uniformly round; average weight about 3 lbs. The most outstanding feature of this variety is that it matures its crops nearly 100% the first cutting.

1 Oz. \$0.80   1/4 Lb. \$2.70   1 Lb. \$8.00

Earliest of All Yellows Resistant

### EARLIEST OF ALL YELLOWS RESISTANT

A variety that truly upholds its name. This is the earliest "yellows resistant" strain of the Golden Acre type, slightly smaller and fully seven days earlier. Many of our growers reported harvesting this variety in 58 days.

1 Oz. \$0.80   1/4 Lb. \$2.70  
1 Lb. \$8.00

Golden Acre Yellows Resistant

### RESISTANT GOLDEN ACRE

(Extra Early) 65 Days

This strain has proven highly resistant to "yellows" and has made it possible for growers to produce a good crop of early cabbage in many areas infested with this disease. The heads closely resemble our strain of regular Golden Acre, but mature a day or two later.

1 Oz. \$0.80   1/4 Lb. \$2.70   1 Lb. \$8.00

HIGHLAND BALLHEAD

Market and require about 10 days longer to mature. The heads are round, very solid and excellent for shipping. Season 75 days.

1 oz. \$0.80

1/4 lb. \$2.70

1 lb. \$8.00

EVERGREEN HOLLANDER

## Highland Ballhead

A single plant selection from Danish Ballhead for a more uniform type and higher tonnage. Heads 7½ to 8 inches in diameter, not unusual for this variety to produce heads from 5 to 6 pounds. . . We recommend this variety very highly for soil not infested with yellows.

1 oz. \$0.70

1/4 lb. \$2.35

1 lb. \$7.00

## Marion Market

(Second Early)

A "yellows" resistant type of Copenhagen Market and one of the first resistant strains to be developed. Marion Market has proven very profitable for many growers because of its dependability and heavy yields even on yellows infected soil. The plants and heads are larger than Standard Copenhagen

## Evergreen Hollander

Yellows resistant is a true Hollander but much more uniform than Wisconsin No. 8; earlier in maturity, smooth large heads with blue-green leaves. Season 95 days.

1 oz. \$0.80 1/4 lb. \$2.70 1 lb. \$8.00

## Globe Yellows Resistant

A strain developed from Glory of Enkhuizen at the Wisconsin experiment station. The heads are globular, commonly six to seven inches in diameter, firm and of good quality. This is one of the best mid-season varieties. Season 80 days.

1 oz. \$0.70 1/4 lb. \$2.35 1 lb. \$7.00

## Wisconsin Hollander No. 8 (Late)

This is a "yellows" resistant strain of the Danish Ballhead type. An excellent late variety for storage and shipping. The plants are large and very hardy. The heads are large, practically round and solid. Season 105 days.

1 oz. \$0.80

1/4 lb. \$2.70

1 lb. \$8.00

## Midwest Ballhead

This finely bred new strain of Danish Ballhead was developed to meet the growing demands by growers for a smaller average head. The plant and head color is deeper bluer green than any other Ballhead that we know of. Don't fail to try this in this year's plantings. Supply very limited. Order early.

1 oz. \$1.00

1/4 lb. \$3.50

1 lb. \$10.00

# CHINESE CABBAGE

## Michihli

This Cabbage is similar to Chihli but with a uniformity hitherto unknown in Chinese cabbage strains. Exceptionally sure heading, vigorous in growth, rich dark green outer leaves without a yellowish cast. The heads are well blanched, firmer and larger than ordinary Chihli. Crisp, tender, fine flavored.

1 oz. \$0.30    ¼ lb. \$1.00    1 lb. \$3.00

## Chihli

1 oz. \$0.25    ¼ lb. \$0.85    1 lb. \$2.50

## RED HACO

The Earliest Red Cabbage. This famous early red variety is again available! The solid, round heads are medium-sized, 3-4 lbs., and mature a little later than Golden Acre. Red Haco is remarkable for its ability to stand a long time without splitting even under adverse weather conditions. The best variety for early harvest.

1 oz. \$1.00    ¼ lb. \$3.50    1 lb. \$10.00

## Golden Acre Elite

Our seed of this popular variety is the true uniform early strain, that we have sold for years and is vastly superior to most stocks sold.

1 oz. \$0.80    ¼ lb. \$2.70    1 lb. \$8.00

MICHIHLI

## Red Hollander Yellows Resistant

The only red cabbage bred and introduced for resistance to yellows. The head is round, solid and dark red in color. We recommend this variety for shipping and storage. Season 105 days.

1 oz. \$1.00    ¼ lb. \$3.50    1 lb. \$10.00

## CAULIFLOWER SNOWBALL STOCK 84

(Formerly Called Midwest Special Snowball)

This strain is of the White Mountain and Snowdrift type, but its crop matures more evenly and about 5 days earlier. Just as heavy and firm as White Mountain and Snowdrift, with unusually good foliage protection, something most other fast-maturing varieties lack. This variety has proved most satisfactory for use under a wide range of conditions. We recommend this for main crop to market gardeners and shippers.

1 Oz. \$4.00      1/4 Lb. \$13.50      1 Lb. \$40.00

**WHITE MOUNTAIN**—The best adapted variety for use under a wide range of conditions and generally considered the most satisfactory strain for main crop for Fall harvest. Plants are large and erect with ample foliage for head coverage. The heads are large, heavy, smooth, compact and very white. This is undoubtedly the best variety on the market today.

1 Oz. \$3.00      1/4 Lb. \$10.00      1 Lb. \$35.00

**SNOWBALL STOCK 57**—is a highly successful introduction and is now widely recognized as the best Snowball strain on the market today. Not only for fall crops but in midsummer as well, it has excelled all others in quality, color and uniformity. It cuts out practically 100% perfect heads, deep and solid with snow white curds. Don't fail to include this in this year's plantings.

1 Oz. \$4.00      1/4 Lb. \$13.50      1 Lb. \$40.00

**EARLY WHITE TOP**—The most satisfactory early variety thus offered to the trade. The plant is sturdy with more protecting foliage to cover the head. We recommend this variety in districts having a short growing season.

1 Oz. \$3.00      1/4 Lb. \$10.00      1 Lb. \$35.00

## CARROTS

Imperator Long Type

**IMPERATOR LONG TYPE** — Outstanding for bunching. Our strain of this famous bunching carrot is much superior to others in smoothness, uniform slender shape and deep orange color. The carrots are ideal for high class bunching trade, growing about 9 to 10 inches long, smooth, somewhat tapering, and the fine dark color is carried right down to the tip. The tops are just right for bunching.

1 Oz. \$0.25      1/4 Lb. \$0.80      1 Lb. \$2.40

**CALIFORNIA BUNCHING** — An excellent strong top variety for bunching. The roots are about eight inches long, cylindrical in shape, pointed when young but become almost stump-rooted at maturity. The flesh is most attractive, deep orange in color. The core is the same color as the flesh, and gives the appearance of having no core at all. We recommend this strain for growers desiring a long bunching carrot. Season 77 days.

1 Oz. \$0.25      1/4 Lb. \$0.85      1 Lb. \$2.50

**NANTES XXX** — The last word in quality. This variety is about seven to eight inches long, one and one-half inches thick, straight cylindrical, strictly stump-rooted at maturity, making this an ideal variety for busheling, yet on account of its strong tops it is well adapted for bunching. Maturity 63 days.

1 Oz. \$0.25      1/4 Lb. \$0.80      1 Lb. \$2.40

**TOUCHON** — A highly refined carrot of the Nantes type but more preferred by many growers because it has longer and stronger tops. Maturity 65 days.

1 Oz. \$0.25      1/4 Lb. \$0.80      1 Lb. \$2.40

**GOLD SPIKE** — A new introduction. It resembles Imperator Long type; but has a much shorter top. 12 to 15 inches tall. Our stock limited this year.

1 Oz. \$0.35      1/4 Lb. \$1.15      1 Lb. \$3.50

Gold Spike

IMPERIDA SHORT TOP

### Imperida Short Top

This variety was specially developed to meet the demand of the critical market for a long, smooth, handsome carrot. The roots are about eight inches long, have rounded shoulders and the flesh is rich, deep orange. Maturity 77 days.

1 oz. \$0.35      ¼ lb. \$1.15      1 lb. \$3.50

### Nantes Strong Top

A new selection developed out of our outstanding strain of Nantes, has the same general root characteristics as the old strain but has a noticeably longer and stronger top. Maturity 67 days.

1 oz. \$0.30      ¼ lb. \$0.95      1 lb. \$2.90

### Gold Pak (New)

An All America selection Bronze Medal Winner for 1956, this rich orange long slender carrot was tailor-made for growers and shippers of bunching or cello-pack carrots. We recommend this variety very highly and be sure to include this in this year's plantings.

1 oz. \$0.40      ¼ lb. \$1.35      1 lb. \$4.00

### Morse Bunching

This variety was developed mainly as a bunching carrot for long distance shipping; tops rather short, roots about eight inches long, deep orange color. This variety does very well on muck soil and should be used more by market growers. Maturity 75 days.

1 oz. \$0.30      ¼ lb. \$0.90      1 lb. \$2.70

Cubit

## CUCUMBER

### CUBIT

1944 Winner of All-America Bronze Medal. This variety is of the A & C and Colorado class, vines prolific, fruit smooth, dark green color, cylindrical with blunt ends; length eight and one-half inches, small seed cavity, an excellent shipper, holds its color, crisp texture and flesh quality well in shipping or on the market.

1 Oz. \$0.30 1/4 Lb. \$1.00 1 Lb. \$3.00

Marketer—A beautiful uniform cucumber and a fine shipper.

### MARKETER

This variety produces very dark green cylindrical fruits which taper slightly at the ends. Fruits are eight to nine inches long. Its uniform shape and dark green color make it an excellent variety for shipping or local market.

1 Oz. \$0.25 1/4 Lb. \$0.85 1 Lb. \$2.50

**NIAGARA**—This is the best mosaic resistant variety in the dark green cucumber class. Fruits 10 to 11 inches long, two inches in diameter and very slender, tapering slightly at the ends. Because of its unusual dark green color and very vigorous vine we recommend this as one of the best varieties for late planting.

1 Oz. \$0.30 1/4 Lb. \$1.00 1 Lb. \$3.00

New  
Mammoth Early Sprouting

## BROCCOLI

Early Propegano, Improved. A specially selected strain of unusually high quality for shippers and market gardeners.

## CUCUMBER MARKETER LONG TYPE

A New Longer and Darker Green Strain.

**MARKETER LONG TYPE**—This variety grows about ten inches long, two inches in diameter and slender. This variety is very popular because of its excellent shape and intense dark green color, which is maintained longer than any other variety. One of the few varieties that do well under nearly any growing condition.

**DARKIE (new)**—By far the finest slicer yet developed. Darkie has the shape, size, color and yielding ability that both growers and their customers want, the fruits are uniformly beautiful, long and slim, color is dark green and the fruit on the late pickings is the same excellent quality as on the first. Be sure to include this in this year's planting.

1 Oz. \$0.35    1/4 Lb. \$1.20    1 Lb. \$3.50

## HYBRID SWEET CORN

**Early Sunrise — Don't fail to try this early hybrid.**

**SUNRISE**—Be first on the market with this early hybrid. In trials conducted here in the middlewest last year this variety matured six days ahead of Spanscross C 4 x 13. The stalk is five and a half to six feet tall, and ears seven and a half to eight inches long. We believe this variety to be one of the best early corns on the market today. 66 days.

1 Lb. \$0.70    5 Lbs. \$3.25    10 Lbs. \$6.50    100 Lbs. \$60.00

## EARLY YELLOW GOLD

This large, early hybrid in all trials last season proved to be an outstanding variety both for productiveness and large, tight-husked ears. The stalks are five and a half to six feet tall, ears are eight inches long and have twelve to fourteen rows of deep yellow sweet tender kernels. 73 days.

1 Lb. \$0.70    5 Lbs. \$3.25  
10 Lbs. \$6.00    100 Lbs. \$55.00

Early Yellow Gold

MAIN CROSS

Main Cross

Of all the hybrids so far developed this is one of the best for shipping and long distance hauling. It is about the same season as Ioana but larger. Ears are eight to nine inches long, fourteen to sixteen rowed. In quality it is unsurpassed as the deep golden kernels remain in edible condition for two weeks after the crop is ready. We highly recommend this as a main crop. 79 days.

1 lb. \$0.70      5 lbs. \$3.25      10 lbs. \$6.00  
100 lbs. \$55.00

Golden Cross Bantam Improved

Our customers were unusually well pleased with this new variety last year and found it far superior to regular Golden Cross Bantam at its finest. It grows taller with broader leaves and a huskier plant than the regular strain and carries the ears higher. The ears are about nine inches long. Very attractive and the same wonderful flavor and sweetness as the regular Golden Cross Bantam. 84 days.

## HEAD LETTUCE VARIETIES

Early Great Lakes

**EARLY GREAT LAKES**—Matures in about 75 days from planting, varying with time of year and locality. It is gray-green in color. The wrapper leaves lay back from the head, exposing a large well-rounded head with a smooth base and small ribs. It is very uniform in maturity. We have records of 95% being cut for market on the first cutting. It is at its best when fully mature. Early Great Lakes received the highest rating in the New York State Trials for 1947.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

Summer Great Lakes

**SUMMER GREAT LAKES**—Matures in about 80 days from planting, depending on locality and time of planting. This variety was selected primarily for its resistance to tip burn, sun burn and rain. A bright green color, large outer wrapper leaves that stand erect and protect the heads from the elements. It is slow to bolt and stands up under most adverse weather conditions when other varieties wilt and pass out of the picture. This is true in all sections of the country where it has been tried.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

**GREAT LAKES IMPROVED No. 118**—This main crop strain matures in about 85 days from planting, depending on locality and date of planting. This lettuce has the rare quality of a completely covered head, which is large, round, very firm and excellent in quality. The plant is dark green and resistant to tip burn and sun burn. The head is so well protected by the upright, extra-fringed leaves that sun burn is impossible. Great Lakes Improved is an outstanding strain for late market or for a section where it is difficult to grow head lettuce because of weather conditions. It is a sure header.

1 Oz. \$0.70    1/4 Lb. \$2.35    1 Lb. \$7.00

Pennlake

**PENNLAKE** is the result of a cross between Imperial 847 and Great Lakes. Because of its crisp, dark green, smooth foliage, it belongs in the general Great Lakes class, without the usual objectionable ribbiness. We consider this variety a genuine contribution to the trade. Matures in about 83 days.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

## PREMIER GREAT LAKES LETTUCE

**Premier Great Lakes**

The greatest and most outstanding success in head lettuce of recent introduction. Developed at Penn State College. This variety is more refined and slightly earlier than Great Lakes. Excellent for Spring, Summer and Fall cutting. In our opinion this lettuce will take the country by storm.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

**GREAT LAKES 659**—An outstanding lettuce with completely protected head, this is a hot weather lettuce but will take hard frost in the late stages of maturing. It is the most tip burn resistant of all Great Lakes having very dark color, smooth base, making an excellent package or carton lettuce, and is a very good shipper. Received the All-Canadian in Canadian trials.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

**GREAT LAKES 66**—A new selection, distinctive for its large plant and dark green color. Upright, medium frilled wrapper leaves give good protection to the large, well formed heads. Butts unusually smooth and well colored. Matures a few days after the Great Lakes 118. Should do well where a large Great Lakes is wanted.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

**CORNELL No. 456**—A selection of the Imperial type developed by the United States Department of Agriculture and Cornell Experiment Station. Has proved very sure heading when grown in the East during the summer months. Particularly adapted for growing on muck soils. Frame and head slightly smaller than Great Lakes and of lighter green color. Resistant to tip burn and early bolting.

1 Oz. \$0.60    1/4 Lb. \$2.00    1 Lb. \$6.00

**Improved Hales Best No. 36 — For quality and uniformity it's "tops".**

## CANTALOUPE

**Improved Hales Best No. 36** is our most popular strain of the Hales Best variety, because of its earliness and uniformity. We have sold more seed of this strain than any other of the Hales Best varieties which is an indication of its success both in the field and on the markets. The flesh is thick, firm, salmon colored and of very fine flavor. The seed cavity is small and compact. The melons are slightly oval, firm and well netted, making splendid shippers. Season 82 days.

**1 Oz. \$0.25    1/4 Lb. \$0.65    1 Lb. \$2.00**

**MICHIGAN HONEY ROCK, Fusarium Resistant**—One of our recent introductions, this fusarium resistant strain is excellent wherever Honey Rock is grown. It is an early, medium-sized oval melon with heavy netting, 4 to 5 lbs in weight and the fine-textured flesh is very sweet. Uniform and a heavy yielder. We find it best if picked at "half-slip" stage. Highly recommended.

**1 Oz. \$0.40    1/4 Lb. \$1.35    1 Lb. \$4.00**

**HARVEST QUEEN, The Leading Market and Shipping Melon**—Harvest Queen is rated the finest melon yet developed in many sections. It is a fusarium resistant Queen of Colorado type, slightly earlier and yields better. The oval melons are medium sized, just right for crating and shipping, with a thick ropy net covering the hard rind. They ripen from blue gray to golden yellow. The deep orange, extra thick flesh is fine textured and very firm with a delicious sweet musky flavor. The quality is still excellent five or six days after picking.

**1 Oz. \$0.40    1/4 Lb. \$1.35    1 Lb. \$4.00**

**SCHOONS HARD SHELL**—A new and excellent flavored melon of the Queen of Colorado type growing about one-third larger and has the qualities of the Queen of Colorado.

**1 Oz. \$0.25    1/4 Lb. \$0.95    1 Lb. \$2.75**

Iroquois

**IROQUOIS (NEW)**—Introduced by Cornell University as Cornell No. 36. The fruit resembles Bender in appearance, but not quite so large, more the size of Seneca Bender but more oval. Under most conditions the flesh is thicker, darker orange and of better quality than Bender. Growers troubled with fusarium wilt will find Iroquois well worth a trial. Season 90 days.

1 Oz. \$0.30      1/4 Lb. \$1.00      1 Lb. \$3.00

**DELICIOUS 51**—The earliest large melon in existence. Fruits are somewhat smaller and several days earlier than Bender's Surprise but in shape and color closely resemble that well known variety. Flesh deep salmon colored, firm and deliciously sweet. An excellent melon for roadside stands. Season approximately 83 days. **Wilt Resistant.**

1 Oz. \$0.40      1/4 Lb. \$1.35      1 Lb. \$4.00

Improved  
Strain  
(Certified)

For the  
Critical  
Melon  
Growers

Watermelon Black Diamond Improved  
Yellow Belly

WATERMELON

**YELLOW BELLY BLACK DIAMOND**—is an improved strain of Black Diamond. Is is a large, round melon with a black, shiny, glossy rind and has no kind of stripe; just solid, smooth black green. Its flesh is blood red, tender and very sweet. It has grayish black seeds. They grow large, most of them averaging 40 to 50 pounds and under favorable conditions will grow 60 to 70 pounds. The rind is very thin and tough and they can be hauled without damage any distance that any melon can be hauled. They are hardy and resist drought better than most varieties. They ripen along with the Black Diamond and other mid-season melons. Certified seed.

1 Oz. \$0.30      1/4 Lb. \$1.00      1 Lb. \$3.00

**CHARLESTON GRAY**—Charleston Gray has high resistance to anthracnose, fusarium wilt, and sunburn. Highly productive, it produces a melon of superior shape averaging 35 pounds. While the rind is somewhat thin it is very hard. Another advantage is that it is relatively free from hollow heart, white heart, and gourdneck. The seeds are black. All this plus its superior eating quality make Charleston Gray the melon with the golden future.

in  
Importance

Blacklee Wilt Resistant

**BLACKLEE**—This melon is truly wilt-resistant. Blacklee is oblong in shape, rind dark green, flesh rich red, seeds black. A very solid melon, free from hollow centers, heavier than any other melon in proportion to size with which we are acquainted. Average weight 30 to 35 pounds. Flesh of fine texture, free from stringiness, crisp, melting and sweet. Our trials have shown it to be nearly 100% free from wilt. Has a tough, thin rind, making it one of the best of all the quality shippers.

## ONION

**Yellow Sweet Spanish Utah Jumbo**—Unsurpassed for production, shipping and storing. Picture taken early in season before bulbs have matured.

### YELLOW SWEET SPANISH UTAH JUMBO

Unquestionably the finest Sweet Spanish for growers and shippers. Produces tremendous tonnage of U.S. No. 1 per acre and stores over entire winter with a remarkably low shrinkage. A vigorous grower and overcomes thrip damage. Bulbs—Large, perfect globe shape, small neck curves down excellently, with heavy protecting deep yellowish-brown skin. If not familiar with this strain we suggest that you try it in comparison with what you are now using; especially if keeping quality, deep color and thrip resistance is desired.

1 Oz. \$0.50      1/4 Lb. \$1.70      1 Lb. \$5.00

**White Sweet Spanish Utah Jumbo Strain**—An Outstanding Strain.

### WHITE SWEET SPANISH UTAH JUMBO STRAIN

This new strain of the White Sweet Spanish was developed in Utah. Bulbs average larger than the regular White Sweet Spanish. Are good keepers, and with outstanding ability to resist the attack of thrips. A very heavy yielder, globular paper white bulbs, flavor very mild, size mostly 4 to 4½ inches when well grown. If you are a grower of White Onions, don't fail to plant this variety.

1 Oz. \$0.70      1/4 Lb. \$2.35      1 Lb. \$7.00

ONION

EARLY YELLOW GLOBE

Early Yellow Globe

The best early Yellow Onion. Will stand storage better than most early varieties. Under normal conditions, bulbs ready 10 days ahead of Southport Yellow Globe Brigham strain. Color rich, deep yellow. Vigorous and productive. Our strain is outstanding for its dark Yellow husk and unusually good keeping qualities.

1 oz. \$0.35      ¼ lb. \$1.20      1 lb. \$3.50

Downing's Yellow Globe

Ours is the true strain of this fine onion which is noted for its long keeping qualities, they are deep globe in shape, with a very heavy skin and dark color. It has become one of the most popular and widely grown varieties for both muck and upland.

1 oz. \$0.40      ¼ lb. \$1.35      1 lb. \$4.00

White Bunch or White Lisbon

We are again able to offer this popular white bunching onion from imported stock. This variety is planted very extensively for table use or green bunching. Produces long slender onions, pure white, mild, and tender. One of the best for bunching under good conditions. It is slow to bulb, has a heavy top that stands up well during summer months.

1 oz. \$0.45      ¼ lb. \$1.50      1 lb. \$4.50

New Wonder Bunch

Strictly a bunching variety as it never bulbs. Planted about May 15th makes an ideal bunching onion for August. Our growers in the South and West have found this variety very profitable for Summer bunching as it holds its dark green tops even during the hottest summer months.

PEPPERS

CALIFORNIA WONDER SPECIAL

California Wonder XXX

An earlier and more productive strain of the California Wonder type, but maturing ten days to two weeks ahead of this variety. Fruits, mostly 4-lobed, blocky with thick, mild flesh. Particularly desirable in areas of shorter season.

1 oz. \$1.00    ¼ lb. \$3.35    1 lb. \$10.00

CALIFORNIA WONDER XXX

California Wonder Special

For large size, good shape and big yields. California Wonder Special is unsurpassed. It ripens about a week earlier than regular California Wonder and produces heavy crops of fine large blocky fruit of the same type as that variety. The plants are medium tall, very sturdy, and produce big heavy peppers in great abundance.

1 oz. \$1.20    ¼ lb. \$4.00    1 lb. \$12.00

Resistant Wonder

Our Mosaic resistant version of our well known California Wonder XXX. Fruit are large, meaty, and blocky. Plants are very sturdy, and remain upright throughout the growing season. Large leaves and medium dense foliage shade fruit well.

1 oz. \$1.20    ¼ lb. \$4.00    1 lb. \$12.00

Bright Scarlet Globe Greenhouse Special Short Top

## RADISH

**BRIGHT SCARLET GLOBE (Greenhouse Special)** is the most attractive variety of the Scarlet Globe type. In the past several years it has proved to be one of the best for outdoor sowing where a short top and a bright, globe-shaped bulb is desired. Does exceptionally well for year around sowing.

1 Lb. \$1.00      5 Lbs. \$4.75      10 Lbs. \$9.00      100 Lbs. \$80.00

**EARLY SCARLET GLOBE MEDIUM TOP**—This variety in every way resembles our Bright Scarlet Globe except that it has longer tops, therefore we recommend this medium top variety for planting in early Spring or late Fall when a longer top is desired.

1 Lb. \$0.90      5 Lbs. \$4.25      10 Lbs. \$8.00      100 Lbs. \$75.00

**COMET**—Brightest colored of the bunching or table radishes, true ball shaped with thin tap root. Quality excellent and it remains solid long after other radishes have become pithy. The tops are a little longer than our Bright Scarlet Globe. This variety does remarkably well on light soil, peat or muck.

1 Lb. \$1.00      5 Lbs. \$4.75      10 Lbs. \$9.00      100 Lbs. \$80.00

**CAVALIER**—A highly colored and very attractive variety for all purposes and especially for shipping. Tops small, roots oblong-globe, slightly longer than broad, very firm and of bright, almost true scarlet, color. Especially adapted for forcing and growing on muck land.

1 Lb. \$1.00      5 Lbs. \$4.75      10 Lbs. \$9.00      100 Lbs. \$80.00

SCARLET GLOBE SHORT TOP  
SUMMER STRAIN

### Radish Scarlet Globe Short Top Summer Strain

A new introduction of the Short Top Scarlet Globe type. Does well on nearly every type of soil. The color is very bright red, olive shaped and stands remarkably long before becoming pithy. Its most outstanding feature is that it holds its short top and produces good olive-shaped bulbs even during the hottest summer months.

1 lb. \$1.00      5 lbs. \$4.75      10 lbs. \$9.00  
100 lbs. \$80.00

### Icicle Short Top

The finest of the long white Radishes, it is so much superior to ordinary stocks of Icicle that there is no comparison. Be sure to try our strain as we have yet to see anything that will equal it.

1 lb. \$1.00      5 lbs. \$4.75      10 lbs. \$9.00  
100 lbs. \$80.00

Spinach Special Summer Savoy.

An excellent strain taken from a single plant selection out of Longstanding Bloomsdale but a decided improvement for summer planting inasmuch as it stands about a week longer without bolting. Very heavily crumpled, dark green and somewhat slower growing.

1 Lb. \$0.70      5 Lbs. \$3.25      10 Lbs. \$6.00      100 Lbs. \$50.00

## SQUASH

Buttercup

Delicata

Large Table Queen

**IMPROVED TABLE QUEEN**—A recent selection out of Table Queen. Average 2 to 3 inches longer and an inch broader than the original strain. Fruits 7 inches long by 6 inches in diameter; dull dark green. Excellent keeper. For best baking quality fruits should be left to mature until shell is hard.

1 Oz. \$0.20    1/4 Lb. \$0.70    1 Lb. \$2.00

**EARLY PROLIFIC STRAIGHTNECK**—In our opinion this is one of the most valuable and promising squashes available today. It is a bush type, early, fruit straight for convenience in packing and shipping, and unusually attractive. Very prolific over long period. All America Selection, 1948. Twelve inches long and 3½ inches in diameter and slightly smaller at stem end; most attractive yellow color. Firm and of excellent quality and flavor.

1 Oz. \$0.20    1/4 Lb. \$0.70    1 Lb. \$2.00

**EARLY SUMMER CROOKNECK**—50 days. Southern planters will find our stock of this highly desirable because of its uniform size and color. Fruits are attractively warted, become 10 inches long and 3½ inches through the bowl at maturity. Neck curved, skin bright orange-yellow. Good for home and market garden use; very prolific.

1 Lb. \$1.25    5 Lbs. \$6.00    10 Lbs. \$11.50    25 Lbs. \$27.50    100 Lbs. \$100.00

Bo-Kay

## TOMATOES

See Complete Tomato Listings on Page 30

**BO-KAY**—We offer a most superb strain of this splendid variety in point of earliness, uniformity and general desirability; particularly valuable for shipping; definite disease resistance recommends this variety for use in sections infested with Fusarium Wilt and Nailhead Rust. Plants thrifty and heavily productive of long bearing period. Fruits uniform deep scarlet; large, uniformly globe-shaped, smooth, solid and of distinct quality. Season 75 days.

Oz.	¼ Lb.	Lb.
\$1.00	\$3.35	\$10.00

**(SUPER BREAK O'DAY)**—A new early-maturing, wilt-resistant variety which is becoming popular in some sections for shipping. Similar to Break O'Day, but the fruits are of deeper scarlet and are free from objectionable yellow about the stem end. The vine has larger stems than Break O'Day and the leaflets are much larger and more abundant. The vines stand up better than the Break O'Day and the additional foliage protects the fruit from sun scald. The fruits are globe shaped with no flat sides. We recommend this variety very highly for your first early crop.

Oz.	¼ Lb.	Lb.
\$1.00	\$3.35	\$10.00

**RUTGERS CERTIFIED**—This variety developed by the New Jersey Agricultural Experiment Station produces a sturdy, vigorous plant with thick stem and an abundance of foliage which protects the fruits from sun scald. The fruits are globe shaped and resemble Marglobe in appearance but ripen a few days earlier and are of a slightly brighter scarlet color. The flesh is firm, bright red throughout and of delicious flavor. Season 80 days.

Oz.	¼ Lb.	Lb.
\$1.00	\$3.35	\$10.00

## VALIANT CERTIFIED — 68 Days

This variety is becoming very popular with market gardeners. A half-brother of Stokesdale, it develops a deep Marglobe type tomato and ripens within 3 days of Earliana. It is 4 days earlier and often 2 ounces heavier than Stokesdale. A valuable tomato for market but not primarily adapted as a canner. Our sales have steadily increased on this variety.

1 Oz. \$1.00	¼ Lb. \$3.35	1 Lb. \$10.00
--------------	--------------	---------------

*We Recommend you try these outstanding new varieties*

### TOMATO SHAWNEE HYBRID

Truly the finest F2 hybrid ever developed. This is not only our opinion but also of every grower who has used it. It has everything, vigor, earliness and maintains its wonderful quality and size throughout the entire picking season. Fruits are globe shaped solid and meaty and they color to an even rich red. Vines bushy, spreading giving good foliage cover. One of our most recent successful introductions, highly prolific. Matures along with Valiant.

1/4 Oz. \$4.50      1/2 Oz. \$8.00      1 Oz. \$15.00

### EARLY BIRD TOMATO — Extra Early — 63 Days

An outstanding variety recently introduced for the finest early market tomato of the present time. The vines are small and should be set about two feet apart. A very heavy yielding early tomato. The fruits are of medium size, smooth, globe shape, evenly colored and unusually firm for such an early type; performs best on light soils with heavy fertilization. Well adapted for northern climates. Don't fail to try this first early variety.

1 Oz. \$2.50      1/4 Lb. \$8.50      1 Lb. \$25.00

### FIREBALL TOMATO — 64 Days

A highly successful, first early tomato. Fireball has very small open vines that can be set only one or two feet apart. The early blossoms set large clusters even in cool weather, and the fruit ripens quickly from pale green to bright red. They are of good size, smooth, globe shape and evenly colored and are unusually firm, mild-flavored and delicious for such an early type. We highly recommend Fireball for your earliest crops, for home use or market.

1 Oz. \$2.50      1/4 Lb. \$8.50      1 Lb. \$25.00

### EARLY RED CHIEF TOMATO — 70 Days

We had crops in Michigan, Kansas, Colorado, Canada and Minnesota last year of this variety and had good results in each section. It ripened only five days later than Victor but far surpassed it in quality. Fruits are medium large globe shaped, smooth and firm, evenly colored bright deep scarlet red, and ripen fully to the stem. Best adapted for light soils.

1 Oz. \$2.50      1/4 Lb. \$8.50      1 Lb. \$25.00

## *How to Order*

**By Carefully Following These Suggestions Many Mistakes May Be Avoided  
AND BETTER SERVICE CAN BE GIVEN**

**FREE TRANSPORTATION** All seeds quoted herein are shipped anywhere in the United States proper by Parcel Post, Express or Freight, our option, all transportation and packing charges paid by us excepting Peas, Beans and Corn which we cannot ship paid beyond the 4th Parcel Post zone unless accompanied with other seed. Large bulk orders which may include Peas, Beans and Corn will be shipped to your nearest express or freight office, transportation paid. C.O.D. and money order return fees are not considered as transportation charges and, therefore, must be paid for by the customer.

**TERMS OF SALE** While our regular terms are cash with order we are pleased to offer open account to gardeners of established credit or who can furnish us with satisfactory business references; at least three established business concerns that have extended credit to you or who know you through past business dealings. (Names of friends, neighbors, relatives, etc., are not sufficient to establish credit relations.)

**HOW TO MAKE REMITTANCES** Remittances may be made at our risk by any of the following methods: (1st and best) Post Office Order; (2nd) Bank Draft or check; (3rd) Express Company Money Order; (4th) Registered Letter. Cash or stamps are sent at purchaser's risk; however, the Postal Department asks us to discourage the use of stamps.

**ORDER BLANK AND ENVELOPE** An order blank and envelope are enclosed for your convenience. We suggest you print your name and address. If you wish to reorder and have no order blank, send it to us on plain paper. It will receive the same prompt consideration. Additional order blanks will gladly be sent on request.

**SHIPPING INSTRUCTIONS** When goods are to be shipped by Freight or Express, give plain shipping directions; otherwise we use our best judgment in routing. Goods on which we pay transportation are shipped at our option.

**LARGE ORDERS** Institutions, Gardeners or Florists wishing larger quantities than quoted are requested to send in list for quotation which will be returned promptly with lowest possible prices.

**NON-WARRANTY** We give no warranty, expressed or implied, as to the productiveness of any seeds we sell and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed. If purchaser does not accept the goods on these terms, they are at once to be returned to us at our expense.—Midwest Seed Growers.
